Augt. 24 March 1701.

[925].

Your last was 22 last 1700. My last mine rec'd his
of 21 June or into July 1701.

In the latter we see with surprise the great number of
recruits for Madras, on the grounds that such was
accounted to His predecessors openly to General Votchkuberg
of which YH writes very brief rather than less facts to
begeter had known supplied were more direct: to which
we must say that all these arguments are not for that time
are not at all applicable now, for considering that the
C of Guinea brings in a present brings us no revenue
profits but a the contrary the charges for it are greater
than the profits. So follows that so much ^{good} expense
cannot be borne as YH has in his letter of 26 Sept 1699
the bygone disastrous expedition & in which it is clearly shown
that YH has many new lost been a the loss of fortune
which YH will find took not was than now. & still contrary
find in the same bygone that the returns & cargo have been
all over seen such & YH has we see as info during
for whole business

the which are means must be taken in hand.

Chas of Great Antwerp to examine his report for vicinity & administration for better defence of coast : con of arm, etc provide the necessary . . .

The Synopse take care.

- And here further printed copies of S.G.'s resolution of 30 Nov 1730 concerning charter for 30 years till end of year 1760 : r of the charter. In his information regarding

they have appeared his etc discharge & reported to him & in his place have applied to him for the Willems de la Palms Schepen & Vroedschap of the town Wassendring : declared who has taken the repairs on the ^{dam} duin provided with the common Art & Instruction copy in the common law of Society S.G. - & that he should care of the effects with Charles of paper taken.

We have also found good to discharge Wm Provan, Chief Factor of Shenn, at his request. etc copies in office of Nicolaas Pott - also apply Peter Knijff who Chief Factor here

Since this copy of 18 December 1702. We have recd
the letters of 25 Sept 1702. & 19 May, & 10 Oct
1703 in which letters have been his repetitions for
"Coste of the Trade. . . ."

As regards "what is desired" by you of the above
letters concerning what has been done & can be
done by the time on the Coast we must say to
you that we have found many matters therein
die ons wel & ook independent die ons zeer
qualijk & yn gewallen & of which we will
now speak in order. So it has appeared to
us not pleasing the erection of lodges at Andra,
Pida & Popo for the holding of slaves there . . .

As also the planting of cotton on the Coast . . .

For we are very pleased with the various gains by
you for holding a suitable lodging for the sick
at Chumic . . .

- they also approve the purchase of 10 Portuguese Bury(?)
for 5 weeks. gold -

Wanted by U.S. and on another side water zessen
dat ons gaus niet en volact U.S. gebouwe
contracte ontient de attecque of Assine, & it
appears to be very improper dat you have let so
many men dwellen on such a loose foundation, &
have sacrificed their blood about such a springe matter
& used untill forces: & among them persons
who had been sent to J^{ts} for the carrying out of
certainly other matters & from whose loss de Coz
was much suffer much: whereby also de ship
Arant has been obliged, contrary to our orders, to
delay so long on the Coast see de departed Ship.
All which such like gevallen we shoud charge & demand
of J^{ts} dat if de same shoud again vorkomen in de
future. Is not with more pacific & circumspection
such on this our speculation about you such loose
grounde want de such matters, & off wel het
voos Assine dat de France wederhand is verloten
& daarvan dat de Coz permission can be taken
we woude however wish dat J^{ts} ^{shall} make any
strayhold or fort there for no man can live in
~~quietness there~~ quietness there. because of

 free & uninfluenced - without causing due any offence
 or giving them bad treatment that it is such we
 mutually cannot understand, & if it should appear to us
 that they are done by offe. we shall then show
 repentment about it.

Whome also we can in no way understand
 doct offe on your own authority & by way of
 a despotic power, shall send into Gallings ship

This book was 19 Decr 1704 (insert in WDC 55. last, & no
inst). - I have since rec'd his letters of 16th August
& 15th Sept 1704. by the first of which letters we find
for unargued & settled various matters concerning the situation
& what hath passed in the Court. To all of
which, ^{to reply} referring in order, we can say to yth. that we
our self later given yths Council held that the
taking into possession of Village Bersou was ^{not} ~~not~~
which yth has verried that de English, & fully ^{completely} is
opposed to same; & danger yth to keep the
of Bersou in possession (beside) till we have
ours & instructions, with your recommendation & such
& practicable to undertake & beholden ^{the} ~~the~~ ^{which seems} ~~to be~~ ^{best order}
reasonably flourishing there to port attend ^{the}

 not more so by the few letters have not
 seen at least letters about the paragraph of
 the Sica Berg to which of the news to refer
 unless the same letter possibly has been
 transmitted by a former reply) ...

[among
 others]

"What is shown in the heading of slaves
 de Elvira"

"What to mention against the actions of the
 French de Paris."

"To build us post one day for news"

"And what to report regarding the building of a post due
 by a French"

... ..
 That of the has resolved to send a static embassy
 to the Indies Maguira & Abini, places as well
 as we hope it may have the desired success
 & bring much profit ought to be by itself

... ..
 We have for seen to our surprise that of the, in case
 for should come to die there, have despaired about the
 decisions of the Council by a resolution without our

our ever loving & true friend to us so ...

And regarding your reply about what we wrote you
privately about your diplomatic power we could well
add a further reply, like the others we pass on the same
to the present at highly recommend ~~it~~ to live
in good harmony & friendship with all our servants
on the Coast.

Therefore we desire of it with the intention of restoring
of 24 before the late Cartwright to superintend the
the present state to commence the same unless
privately mentioned of a resolution of the Assembly.

And as we have always found that the greatest
protection & defence of the Coast consists entirely
in keeping a good harmony & intelligence with
the natives so well we recommend of it to live
in a good understanding & friendship with the same
in order that they, if required, may be ready to
bring help or assistance

on the 12 Augt last. but in reply to
ours of 22^d Oct 1709 but have seen how
it is with surprise that y^t still the discovery
& finding of gold is de long time on the coast
as impossible & entirely wth from de hand, as
we had expected from y^t on that point that you
would have surprised us some indige suitable
means to obtain gold & especially because your
Pederesen General Peter says has very favorable
ideas about that work & if he had remained
clearly possibly would have been of great
success And we are absolutely of the sentiment
that gold is to be had on the coast
if the necessary means was taken in hand.
... We desire expect you to reconsider
the matter & send several copies of that letter

The ship *Afucan*, Galley, was must have taken in some African sand, & of which we are confident J. H. B. intention has been to have the same guy Guyveron at home, to see if any desired profit was to be got out of it: About which our care is no need to doubt. For here in this country we will seldom find earth in which no minerals are found but at one place more than at another: & what we have experience in course of time is that gold is found abundantly in a *Vette* & *Klychtige* as in a *Schrale* & sandy *rande*.

And in order to explain this our challenge with fundamental reasons we can testify to J. H. B. that we ourselves have been eye-witnesses that the reports of the *Iguera* district, situated at the *Anta* river, have found a quantity of gold out of a foot depth while they had more, ~~was~~ within 2-3 hours found more than 4 ounces gold (which was in *Vette* & not clay sand) & which did not appear to be of a bad clay. The inhabitants along the river also labour daily

is seeking minerals both on & in the hills which are
of extraordinary height & many in number, as also in the
strong slopes of the river & its sprangles where
they also find much gold $\frac{1}{2}$ daily, & that in a very
ordinary manner, only using, a net to get gold out
of the river & pieces of hoop iron with which they
fetch up the sand which they then quiver
by means of water in two hollow hollow baskets
barkin [barken]. These who work in the hills have
small criss which they after an extremely long time
at last get a depth of from 10-12 yards high
where they are, when they are lucky, find sometimes much
& also less. It is always thought that the
minerals of that river are much rich were there
which one may well conclude that they must obtain
much gold by their labour. These people beguile
their voracious threni who have us, Y.H.H., who
have seen more Copacabana & Valparaiso for alone
them, but whose for if we will undertake the same
work dig for a volume on highland for in our
opinion good success is not to be expected
for which the river Putubur would be the most
propitious site for inland one undertakes it the more
gold would be found: therefore we are of opinion that

1710

it would have been undertaken as high up the
river as possible then was it up to the place
where the bridge of de Hon loz has stood.

But, such an expensive undertaking many
such enormous works be required & finally

3 or 4 millions (of which one must be in command)
Belgians 3 or 4. Ensaajans (?) 25-30

Luyken third branders who are accustomed to
such fatigues daily, which were apt to
have 25 working handsmen for their
scoot, if several wide that they are

attacked which is with brand by us in the
leaf, that the holes in the or de river banks
would appear then & they must keep ^{the boats} ~~out~~

& find two their manifold enemies: the first
that occurs was over een ontschroep
gewal would have to work. the second

also require it most 2-300 ^{men} ~~men~~ slaves
whod of the wood also plan also to be schaudelt
who would be employed in working the

sand. Besides which we should also require
2.5 flat bronze schuyten op die wyse

de benodigdheden daily to laten aan halen &

bringen. which ^{could} ~~ought~~ very soon, to drive on the river
the whole of the ~~the~~ ^{the} ~~river~~ ^{river} which goes
continually. And if we are furnished with the above
motives it is very necessary when then we are completely
in a state ~~being~~ ^{being} the same, under Gods help, to proceed
and.

... The Portuguese Nation at the time they had possession on
this Coast (according to the statements of our old voyagers to us)
worked in the river navigation with a sort of Bénédicts
in the manner as the modern Dutch Nation, who clean the
canals in the North Sea, ~~use~~ use, with a great boat
bound to it ~~rather than~~ ^{rather than} the small wide broad
hollow boat in Guiney or their slave women
which were Bénédicts, but which are still living in countries
situated in the North of Brazil which were employed by
the Portuguese for that purpose; but whether they found much
invention with them ~~to the purpose~~ ^{to the purpose} I have not been able
to learn from the voyagers: the said river is also the most
fertile ~~of~~ of all on the Coast for the planting of indigo
whether be so long as we have no one who understands
Indigo cultivation we cannot take the same in hand.

Recd of Amst. 27 September 1712 ✓
 Advise your letter of 15 May 1712. with the
 reports annexed thereto in reply to which we
 were told say that it has appeared on deliberation
 to us & we cannot understand how the
 war, which is being waged there in the
 Country, has gotten on about such a small
 charge a futile cause, namely over a ^{negro woman} ~~negro~~ ^{woman};
 & since less than we have been able to
 be taken how the Chiefs of the Company have been
 able to dig in wickelen in such a war. How
 do you spend such a considerable quantity
 of gold in the war did not incur this
 loss in the least nor would be brought the
 least profit, & on the contrary could cause
 only cause damage: woorlopens let can
 of the immense burden is of the low coast
 by experience that the interest of the Co^y
 for the greatest part consists in the purchase
 operations of Trade on the Coast &
 leads to get gold in the Cassa which
 is always present & prevented by wars & the

its only true advantage; therefore we ~~the~~ &
entirely appropriate of the advantages or participation of that
war & the struggle must very seriously charge itself to

manner & as ^{quickly} as possible; & above all to take care
that all the good that has been contributed on behalf
of the City be again brought into the Cassa & the
City does get down quiet about it. And if that
we have to avoid all wars in the future & not
engage in them but in the retirement security when
the same can by no other means be secured, & then
only if it comes to happen under facts & the territory
of the City such less complaisance of other nations
as in this case is possible says as Blitters. In
reply to this we shall expect to learn from Blitters.
how matters concerning the war shall have

As much is to be seen in the trade with the Portuguese, the Co^y can surely draw large profits. It is therefore strongly recommended to treat the Portuguese with all sorts of civility & friendship to continue the trade with them on the same footing as is now done, to prevent ill-treatment of the Portuguese vessels of which we need for time to time. It is likewise recommended to use of Co^y ships with discretion in both of which the success has been very little better than the Port: who depend on the former concerned.

Four bundles ofquipages to the respective ships.

We also see from the last Journal brought out by the ship Factor Galey that the English wish to undertake to inquire into the taking possession of the hedges or lands of the Co^y. We must therefore seriously recommend you to prevent that & to converse well the Port & hedges of the

of Slave Trade - to Africa Suriname &c -

As they have resolved to repair all parts of all boats
bring them to a proper state to receive their
burden of timber collected ^{in large quantities of time} (especially for Porto Rico, Madrid 20/5/20)

They have had the Decree of 23. of 8 Oct 1680
renewed by same, but in place of death penalty for
subjects ^{any} sailing on ships sailing within trade of
Africa outside the Coast has been substituted a years ban
in some cases.

As we are now in a better state ^{of the Coast} than
formerly to forget other trade for matters in the C
of G. and more success among they are we have to use his
last resolution to bring back better profits for the Coast

This will serve to accompany a copy letter from
Remaint Houdens written at Loisobon the
29th August this year addressed to the
Officers of their botas here which of it will
be gecompromitt with the Portuguese on the
Coast of Africa have a correspondence which
is to be feared he can offe scande (?)

with injury of the Coz will not werken, we
also refer to what was written on the subject
in our former letter to It & recommend
you to be attentive to prevent that any injury
be done with compz either by Jan Coumz

or other acties: like as It will also have
to "observe" the servants of the Coz so that
they are prevented from holding any

inferior correspondence with de Patruense or any
other nation. It will also be very for you
concerning de Stappers of de Company's ships to take
care that they might not be Reschuldigt amongst
